

Day One Activities:

Story – Genesis 1:1-5

Song – We’ve Got the Whole World

Science – Salt and Pepper static separation

Song – This is the Day

Book – The Darkest Dark

Snack – Oreos

Song – Over My Head

Craft – Galaxy Slime

Song – This Little Light of Mine

Instructions:

Science – Place the coarse salt and pepper on a plate. Encourage the child(ren) to try and separate out the salt and the pepper. After a few tries, give them the plastic spoon, and a towel, and “charge” the spoon by rubbing it. The static electricity in the spoon will pick up the pepper! (If it doesn’t work at first – you may need to charge the spoon more)

Snack:

Ingredients on reverse.

Craft - Galaxy Slime:

The first choice is if you’re making black/starry slime, or coloured slime, or both. The black slime uses the black glitter glue, and the coloured slime uses the clear. The separate instructions are just to keep things simple, but the recipe is basically the same:

<p>Black Galaxy Slime 1 (6 oz) bottle black glitter glue (your bottle may say 8oz – but some has been removed to make it easier for the child to pour the whole contents in) ½ cup water (not provided) ½ tsp baking soda 1 tbsp saline</p>	<p>Coloured Slime 1 (5 oz) bottle clear glue ½ cup water (not provided) ½ tsp baking soda 1 tbsp saline Food Colouring (not provided) Glitter (you don’t need a lot)</p>
--	---

You’ll need a teaspoon and a tablespoon measuring spoons, and a ½ cup measuring cup as well as a bowl to mix your slime!

Combine the bottle black glitter glue, 1/2 a cup of water, and 1/2 a tsp of baking soda. Stir well to combine. (If you’re doing the coloured mix – add the glitter and food colouring here). Add 1 tbsp saline solution and mix. You will see the slime instantly begin to form.

It will be super sticky but as you continue to mix and then knead the slime with your hands. Continue to knead until it is no longer sticky (may take awhile). Store in an airtight container!

In the packing kit for Day one:

Coarse salt
Pepper
Plastic Spoon

Black Glitter Glue
Clear Glue
Glitter
Baking Soda
Saline
Container to hold slime

Oreos/ GF Oreos

Oreos: wheat flour, sugar, modified palm oil, vegetable oil, cocoa, glucose-fructose, wheat and/or corn starch, salt, soy lecithin, baking soda, ammonium bicarbonate, unsweetened chocolate, artificial flavour.

Kinnikinnick brand “KinniToos” chocolate sandwich cookies: **free from Nuts, Gluten, Soy, Dairy, Peanuts**

Sugars (cane sugar, tapioca syrup), Non-hydrogenated shortening (palm oil, modified palm oil), Pea starch, Potato starch, White rice flour, Cocoa powder, Tapioca starch, Water, Pea protein, Salt, Natural flavour, Pea fibre, Sunflower lecithin, Inulin, Sodium bicarbonate, Modified cellulose. May contain: **eggs**
